

The Longleaf Alliance's Longleaf Academy: Longleaf 101

An in-depth classroom and field instruction in “all things longleaf”. The intent of this 2.5 day course is to better prepare landowners and natural resource professionals to address management problems specific to longleaf ecosystems. Through training and education, the goal is to create a uniformly well-informed network of longleaf managers to extend the work of The Longleaf Alliance.

Topics will include:

- The history of longleaf pine
- The use of fire in longleaf ecosystems
- Artificial regeneration, including site selection, site preparation, seedling quality and planting, and release techniques
- Natural regeneration systems
- Stand management
- Managing for wildlife habitat
- Understory restoration
- Diseases and insect identification
- Economics, products, and available resources and materials

Who should attend? Private forest landowners, contractors, nursery representatives, wildlife biologists, natural resource professionals, and anyone interested in longleaf management.

Date: **Tuesday May 23, 2017 8:30 am -
Thursday May 25, 2017 12:00 pm**
