

The Longleaf Alliance's Longleaf Academy: Herbicides & Longleaf 201

Herbicides & Longleaf 201 covers herbicide choices for the ecological restoration, site preparation, and management of longleaf pine systems. Students will learn considerations for controlling unwanted species while minimizing impact to longleaf pines and other desired composites and plant communities.

Topics will include: herbicide rates, timing of application, active ingredients, surfactants and adjuvants, and safe application methods.
