

# THE LONGLEAF ALLIANCE

## ***Longleaf Academy: Herbicides & Longleaf 201***

***Herbicides & Longleaf 201*** focuses on the herbicide choices available for the site preparation, ecological restoration, and management of longleaf pine systems. The 2-day training will cover the topics of herbicide rates, timing of application, surfactants and adjuvants, targeting and control of invasive and unwanted species, and how to preserve desirable native plants in longleaf settings. ***Herbicides & Longleaf 201*** will give participants the tools needed to incorporate herbicides into their forest management in order to achieve their own unique objectives.
