

Longleaf Academy: Herbicides & Longleaf H201

Herbicides & Longleaf 201 will give participants the tools needed to incorporate herbicides into their own unique forest management objectives.

Herbicide choices regarding site preparation and herbaceous and woody release will be emphasized, along with the following topics:

- herbicide rates and timing of applications
- surfactants and adjuvants
- control of invasive and unwanted species
- preserving desirable native plants in longleaf restoration settings

THE
LONGLEAF
ALLIANCE
