

Longleaf
for All

The National Wildlife Federation and Longleaf for All partners have an exciting new opportunity for forest landowners in the historic Longleaf pine range! With the overwhelming success of Hodges Estate Demonstration Forest in Georgia, we are seeking to expand our network into Florida, Alabama, and South Carolina.

Mr. Hodges' property is showcasing his success with longleaf and wildlife habitat restoration, balancing economic and ecological priorities.

Outreach opportunities include: Prescribed Fire Training, Heirs' Property, Sustainability Practices, Funding Opportunities, and much more!

Our Longleaf for All Landowner Mentorship Program is seeking applications from historically under-resourced landowners to join our mentorship program to share expertise and host events on their properties for unserved, underserved, and other minority forest landowners. Landowners will be compensated for their involvement. Come join the cause and help educate others on the importance of sustainable forestry! For more information, visit our website today:

NWF's Longleaf for All Landowner Mentorship Program Application Form

The National Wildlife Federation and other partners are seeking minority longleaf pine forest landowners that are interested in sharing their farm and knowledge with unserved, underserved and other minority forest landowners and would like to utilize their property as a forest demonstration site for outreach/education. Landowners interested in participating in a three-year project should complete the application below.

Please complete the packet and return it to NWF (Email preferred) to:

Katrina Koning

KoningK@NWF.org

PO Box 15365 | St. Petersburg, FL 33733

Farm/Timberland Description

(Please type or print by hand)

Name:

County:

Address (State, City, Zip code):

Phone:

Email:

Years owned:

Is the landowner operating under a stewardship plan, management plan, or other written conservation plan? Yes No

Will the landowner allow a site visit by the NWF's program coordinator? Yes No

Section I: Land Description

Discuss the past and current land management practices conducted on the property, including but not limited to the following practices: timber management, prescribed burning, brush control, wetland restoration/improvement, etc.

Section II: Land Management Goals

Describe the forestry and wildlife management goals of the operation:

Describe the landowner's willingness to share personal stories of their management scenarios to fellow landowners and professionals as well as serve as a mentor to other forest landowners:

Section III: Leadership, Outreach and Community Service

Describe the landowner's involvement in the local community and agricultural community.

Section IV: Supporting Information

In this section the applicant has the opportunity to describe specific stewardship practices in greater detail. Supporting information such as photos, maps, data and letters of support may be included with the application (please attach or email.)

The signature of the landowner or authorized agent indicates application for NWF's Longleaf for All Landowner Mentorship Program.
